Sensex reclaims 38,000-mark

RELIANCE RALLIES TO LIFETIME HIGH

PTI ■ MUMBAI

Equity benchmarks returned to winning ways on Thursday after a day's breather, propelled by market heavyweight Reliance Industries which soared to its lifetime high.

After a subdued start, the 30-share BSE Sensex gained momentum in afternoon trade before finally closing at 38,140.47, up 268.95 points, or 0.71 per cent.

The benchmark ended above the 38,000-mark for the first time since March 5 this year. The wider NSE Nifty advanced 82.85 points, or 0.74 per cent, to finish at 11,215.45.

Reliance Industries accounted for the lion's share of the Sensex's gains, spurting

2.82 per cent to its record closing high of ₹2,060.65, following reports that Amazon was eyeing a stake in the conglomerate's retail arm.

SBI, ICICI Bank, Tech Mahindra, ITC and Kotak Bank were among the other winners, advancing as much as 3.28 per cent.

On the other hand, Axis Bank, HUL, Infosys, TCS, UltraTech Cement and L&T tumbled up to 3.80 per cent.

"Benchmark indices ended the day with gains, following positivity in the global markets. Global markets set aside the rising US-China tensions and focused on potential vaccine developments and better-than-expected earnings numbers."

"Domestically, except for IT, most major indices were in the gains. Liquidity seems to be driving the markets. Any dip looks like it will be bought into and is likely to be short-lived, especially in the current mood of the markets when the negatives are being overlooked," said Vinod Nair, Head of

Research at Geojit Financial Services.

BSE energy, healthcare, realty, auto, oil and gas, bank and metal indices ended up to 2.36 per cent higher, while IT, tech and telecom closed with losses. Broader BSE mid-cap and small-cap indices surged up to 0.98 per cent.

Global markets were

international oil benchmark Brent crude futures rose 0.93 per cent to USD 44.70 per barrel. In the forex market, the rupee settled on a flat note at 74.75 against the US dollar.

₹ gives up gains to end flat at 74.75 against \$

PNS ■ NEW DELHI

Mumbai: The rupee gave up day's gains to settle on a flat note at 74.75 against the US dollar on Thursday amid concerns over growing tensions between the US and China. At the interbank forex market, the domestic unit opened on a strong note at 74.65, but erased the gains to finally close at 74.75, unchanged from its previous closing.

During the session, the domestic unit witnessed an intra-day high of 74.52 and a low of 74.87 against the US dollar.

Forex traders said the uptick in the rupee during the day was supported by weak greenback, foreign fund inflows and positive domestic equities, but rising tensions between the US and China weighed on investor sentiment and restricted the gains.

Meanwhile, the dollar index, which gauges the greenback's strength against a basket of six currencies, rose 0.01 per cent to 94.99.

'No employee of Air India will be laid off'

No reduction in the basic pay, dearness allowance and house rent allowance and no employee

PNS ■ NEW DELHI

After strong reactions from its pilots, Air India on Thursday said that no employee of Air India will be laid off. "The meeting reiterated that unlike other carriers which have laid off large number of their employees, no employee of Air India will be laid off," the national carrier said on Twitter. It further added that there has been no reduction in the basic pay, dearness allowance and house rent allowance of any employee.

"Allowances had to be rationalised owing to the airline's difficult financial situation already exacerbated by the novel coronavirus pandemic, the statement added.

Air India further clarified that its flying crew will be paid as per the actual number of hours flown and the Board's measures regarding allowances will be reviewed as domestic and international flight operations expand gradually.

Earlier this month, India's national carrier approved a scheme enabling its Chairperson and Managing Director Rajiv Bansal to place employees on compulsory leave without pay for six months or a period of two years, extendable up to five years. The scheme was approved during the 102nd meeting of Air India's Board of Directors.

GST, I-T mop up in Q1 very encouraging, indicates economic recovery: Finance Secy

PTI ■ NEW DELHI

Tax mop up in first quarter of the current fiscal is "very encouraging" and indicates that the economy is recovering sooner than what was anticipated at the time of imposition of lockdown, Finance Secretary Ajay Bhushan Pandey said on Thursday.

He said the Revenue Department wants to bring in self-compliance among taxpayers by making available data of all financial transactions via Form 26AS at the time of filing income tax (I-T) return.

Pandey, who is also the Revenue Secretary, said about 70 per cent of the ₹ 91,000 crore Goods and Services Tax (GST) collected in June is on account of transactions in May.

"For the month of June, going by the current trends, we have certain trend about how many people have made payment so far, and also the e-way bill...Truck movement...All these things are giving encouraging signals that the economy is coming back to the realm sooner than what was being anticipated when the lockdown was started in March," he said while addressing a FICCI event here.

Besides, income tax collection, by way of advance tax and TDS, in the April-June quarter was about 80 per cent of what was collected in the same period last year. "These two numbers - GST and income tax - are encouraging numbers and also gives us some hope that wherever possible businesses are finding

ways to get started. But there were certain sectors like hospitality, education, tourism, which are facing difficulty," Pandey added.

The Government had in May notified revised Form 26AS which would have additional details on taxpayers' high-value financial transactions like cash deposits/withdrawal, property purchases undertaken during a financial year, and would facilitate voluntary compliance and ease of e-filing of I-T returns.

Pandey said a person sees all his transaction at one place, it makes return filing easy and helps honest taxpayers. It also sends a message to those persons who are on the borderline, and they would also try to be on the right side of law.

"What we want to promote is self-compliance instead of somebody being sent a notice and then somebody going through some kind of harassment or difficulty, we are making all those information available," he added.

With regard to digital lending by banks, Pandey said if tax-payment profile of a loan applicant is made available to the banks, it would make it easier for lenders to assess how much loan can be extended.

"...We have all these information, these information can be shared in a secured manner...We are working on that, we had several rounds of meetings with several stakeholders and we are working on this," he added.

Indian economy set for post-Covid-19 rebound as FDI remains buoyant, says IHS Markit

New Delhi: The Indian economy is likely to rebound in the second half of 2020 as the impact of the COVID-19 pandemic recedes, and is projected to grow by 6.7 per cent in the next financial year, IHS Markit said on Thursday.

The pandemic resulted in severe disruptions in industrial production and consumption spending in India during April and May.

"The severe negative impact is expected to result in a significant contraction in GDP in the April-June quarter of 2020, resulting in a recession in the 2020-21 financial year with GDP expected to contract by 6.3 per cent year-on-year," it said in its outlook on the Indian economy.

However, as lockdown conditions have been progressively eased, early signs of recovery were evident in the most recent economic data.

The IHS Markit Purchasing Managers' surveys for India showed that economic momentum improved in June, reflecting the easing of COVID-19 related restrictions during May and June.

India imposed a total lockdown beginning March 25 and restrictions were eased from May. "IHS Markit forecast that the Indian economy will rebound as the impact of the pandemic recedes, with improving economic growth momentum in the second half of 2020 and positive GDP growth of 6.7 per cent in the 2021-22 financial year," said Rajiv Biswas, Asia Pacific Chief Economist at IHS Markit.

Despite the negative short-term shocks from the pandemic, total foreign direct investment into India has remained buoyant. Foreign direct investment by technology firms in the first seven months of 2020 has already reached around USD 17 billion, boosted by the USD 10 billion new investment announced by Google in mid-July.

Jio tops Trai's 4G chart with 16.5 mbps download speed in June

PTI ■ NEW DELHI

Reliance Jio topped 4G speed chart with an average download speed of 16.5 megabits per second (mbps) in June, while Vodafone and Idea led in terms of upload speed, according to Trai data.

Idea followed Jio in download speed chart with 8 mbps speed,

the latest data published on Trai's Myspeed portal showed.

The Telecom Regulatory Authority of India (Trai) recorded average download speed of 7.5 mbps and 7.2 mbps on 4G network of Vodafone and Bharti Airtel in June.

For upload speed, Vodafone and Idea led the

chart with speed of 6.2 mbps each. Jio and Airtel recorded average upload speed of 3.4 mbps each.

Download speed helps in accessing messages, pictures, videos, etc., sent by others, while upload speed helps subscribers in sending messages, pictures, etc., to their contacts.

Govt wants PSUs to trigger change in investment climate hit by Covid

PIANS ■ NEW DELHI

Government has asked Public Sector Undertakings (PSUs) to complete all their planned capex for FY21 on time and become vehicles of growth for the economy hit by the coronavirus pandemic.

With private investment on a standstill, the Govt wants companies administered by it to change the mood in the country by stepping up expenditure and generating economic activity that results in income generation and job creation. At a review meeting held by the Finance Minister Nirmala Sitharaman on Thursday with Secretaries of Ministries of Civil Aviation, Steel, and the Chairman Railway Board along with the CMDs of 7 CPSEs belonging to these Ministries, the Finance Minister said that better performance of CPSEs can help the economy in a big way to recover from the impact of

COVID-19. In this regard, she said it is important that CPSEs ensure that capital outlay provided to them for FY21 is "spent properly and within time". Sitharaman asked secretaries to closely monitor the performance of CPSEs in order to ensure capital expenditure to the tune of 50 per cent of capital outlay by Q2 2020-21.

She said that to achieve this planning should be done in advance and all unresolved issues should be brought before the ministry for immediate solution. The concern this year is that sluggish economic activities on account of COVID-19 and sagging demand conditions may also push PSUs to step back on their investments. In FY 2019-20, against the CAPEX target of ₹30,420 crore for the 7 CPSEs, the achievement was ₹25,974 crore i.e. 85%. In Q1 (FY 2019-20) achievement was ₹3,878 crore (13%) and achievement of Q1 (FY 2020-21) has slowed down to ₹3,557 crore (14%).

Green shoots of recovery to sprout faster in non-metro markets, says EY survey

PTI ■ NEW DELHI

The green shoots of recovery are expected to grow faster in non-metro markets due to "higher resilience" shown by non-metro cities during the COVID-19 pandemic, says a survey by consultancy firm EY.

The EY survey, which polled over 4,000 respondents equally divided between metro and non-metro markets, was conducted to ascertain the potential impact of pandemic-related disruptions on consumer sentiments, its report said.

Categories like consumer goods, travel, entertainment, automobiles and white goods are all expected to see increased and faster recovery of demand from non-metro markets post the lockdowns, it added. "Non-metro markets have shown higher resilience than metro markets in our study and could recover faster. The percentage of respondents who expected to spend more than before on a majority of categories was much higher in non-metro markets, indicating that when the lockdowns end, green shoots of recovery would probably sprout faster in these markets," EY said.

Respondents in non-metros are expected to spend much more on consumer goods, travel, outdoor and automobiles as compared to their metro counterparts, it said.

According to EY India Partner and Media & Entertainment Leader Ashish Pherwani, the COVID-19 pandemic has radically shifted way of life.

"However, despite uncertain and challenging conditions, our research shows that non-metros express a higher degree of resiliency and a resolve to bounce back quicker compared to metros. We may see long-term and even permanent changes in consumption patterns," he said.

Extend by 2 years compulsory gold 'hallmarking', urges CAIT

PIANS ■ NEW DELHI

Citing higher prices and low supply, the Confederation of All India Traders on Thursday urged the Centre to extend the provision for compulsory gold Hallmarking by two years, so that leftover stock can enter the market.

On Thursday, gold prices went up to ₹51,500 per 10 gram, while silver ended at ₹62,000 per kg. CAIT said adding that the safe asset class has gained demand as an outcome of the Covid-19 induced economic turbulence.

Accordingly, the confederation expects a sustained demand for gold and silver dur-

ing the festive season starting from Raksha Bandhan on August 3.

The confederation expects gold prices to touch ₹55,000 per 10 grams on Diwali.

According to Praveen Khandelwal, Secretary General, CAIT and Pankaj Arora, National Convener of All India Jewelers and Goldsmith Federation, silver price is expected to be in a range of ₹72,000 to ₹75,000 per kilogram. He was quoted as saying in a statement: "Gold has always been the best and safest choice of investment for the customers as gold prices generally keep on increasing whereas on the other hand, it

is also the most important investment for traders which is quite safe."

Prior to the lockdown, gold prices stood at ₹41,000 per 10 grams and that of silver was at ₹40,000 per kg and now in a period of just 4 months there is an increase of 28-30 per cent in gold and in silver the increase is of about 45 per cent, he said. The confederation said that to allow the jewellers to liquidate their old stocks, the Centre should provide a further extension of 2 years, in the view of Covid-19 disruption. Earlier, the Centre had made 'Hallmarking' on every gold item compulsory from January 15, 2021.

Rossari Biotech makes blockbuster stock market debut, zooms 77 pc

New Delhi: Shares of specialty chemicals manufacturing firm Rossari Biotech made a stellar debut on the bourses on Thursday, and closed nearly 77 per cent higher against its issue price of ₹ 425 per share. The stock touched its highest trading permissible limit for the day on the BSE as well as NSE.

The stock listed at ₹670, registering a gain of 57.64 per cent on its issue price on the BSE. During the day, it jumped 89.17 per cent to ₹804 - its upper circuit limit. It finally closed at ₹742.35, up 74.67 per cent. On the NSE, it closed at ₹752, a gain of 76.94 per cent. During the day, it jumped 88.96 per cent to ₹803.10

The company's market valuation stood at ₹3,854.98 crore on the BSE. In terms of volume, 30.27 lakh shares were traded on the BSE during the day, while 3.57 crore shares changed hands on the NSE.

It has been a long hiatus in IPO for many months since COVID epidemic started. Rossari Biotech's success in retail, HNI and institutional segments brings a good omen and shows tremendous appetite for good quality equity paper in Indian markets," BSE CEO Ashishkumar Chauhan CEO said on the listing.
